GEOGRAPHY GRADE 10

TOPICAL REVISION BOOKLET

ANSWER BOOKLET

STRAND 1: PRACTICAL GEOGRAPHY

1.0 Introduction to Geography

1.0.1 Definition and Branches of Geography

1. Define Geography as a subject of study.

Geography is the study of the earth's physical features, atmosphere, and human activity, including the spatial relationships between people, places, and environments.

2. Explain Geography as the study of interrelationships between natural and human phenomena on the earth's surface.

Geography examines how natural processes (e.g., climate, erosion) affect human activities (e.g., farming, settlement) and how humans modify natural environments (e.g., deforestation, urbanisation).

3. Name and briefly describe the three main branches of Geography.

· Physical Geography: Study of natural features and processes.

· Human and Economic Geography: Study of human activities and economies.

· Practical Geography: Skills and techniques for geographic analysis (map work, statistics, GIS).

4. What does Physical Geography deal with?
