			garden promotes sustainable use.
13	Some communities practice shifting cultivation without allowing the land to regenerate, leading to soil depletion and reduced plant growth. What biblical principle of responsibility over plants are they neglecting?	A) **Stewardship and sustainable use of the land**.	The practice of not allowing land to regenerate is a form of short-sighted, unsustainable use that depletes the resource, neglecting the principle of stewardship.
14	A student observed that the trees in their neighborhood help clean the air and provide shade. This observation reinforces which vital role of plants in the ecosystem?	B) **Enhancing environmental quality**.	The trees' role in cleaning the air and providing shade are direct examples of how they enhance the overall quality of the environment.
15	What does Genesis 2:15, "The Lord God took the man and put him in the Garden of Eden to work it and take care of it," imply about humanity's initial role concerning plants?	C) To **cultivate and preserve them**.	This verse clearly establishes that humanity's original role was to actively work the land (cultivate) and also to protect it (take care of), which is a balance of use and preservation.
16	Which of the following is an example of applying biblical teachings to conserve the environment through plants?	B) **Participating in a tree-planting exercise**.	A tree-planting exercise is a direct and positive action that contributes to the conservation of the environment, aligning with biblical stewardship.
17	A Grade 7 learner composed a poem about the beauty of flowers and the importance of not trampling on them. What is the learner expressing through this poem?	B) **Appreciation and respect for plants**.	The poem's content, focusing on the beauty of flowers and the need to protect them, is a clear expression of appreciation and respect for plant life.
18	Responsible use of plants directly contributes to economic growth by providing:	B) **Raw materials for industries, food, and medicinal resources**.	Plants provide a wide range of essential resources that are vital for various industries, food production, and medicine, all of which contribute to economic growth.
19	When a community works together to reforest a degraded area, they are demonstrating:	B) **Collective stewardship over plants**.	The act of a community working together for a common environmental goal like
