NUMBERS - CBC GRADE 1 MATH LESSONS

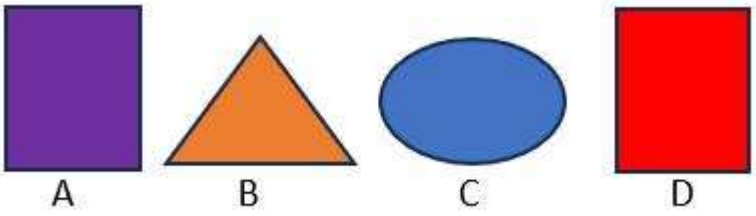

NUMBER CONCEPT - CBC GRADE 1 MATH LESSONS

Lesson 1: How to Sort and Group Objects According to Colour

What is Sorting?

- Sorting is to put same things together into a group.
- We can sort objects according to colour, shapes and sizes.

Example: Put the same shapes together.

Therefore**:**

A and **D** are the same

B and **C** are different.

Ways of sorting and grouping

- Collect different colours of balloons: red, blue, green and yellow and help the learner group them according to colour.

1. Which ones have the same colour?
