SCIENCE AND TECHNOLOGY GRADE 5 TERM 3

Questions

1. James observed some characteristics of mammals in the environment. From what he observed, it is true that all mammals;

    A. A. reproduce by giving bath
    B. B. Feed on both flesh and herbs
    C. C. have a constant body temperature
    D. D. are cold blooded
2. Which of the following parts of a computer plays the function of processing data?
    A. A. CPU
    B. B. Mouse
    C. C. Monitor
    D. D. Keyboard
3. Why are mirrors of toilets and bathrooms made of frosted glass? A
    A. A. To minimise the amount of light getting in
    B. B. So that those in the toilet or bathroom cannot see outside
    C. C. So that those in the toilet or bathroom cannot be seen by those outside
    D. D. To ensure that bad smell does not affect those who are outside
4. During the cold weather, Mwangi put on a woollen jacket as shown below.

    Why do you think he did so?

    A. A. It keeps the body from water loss into the environment
    B. B. It generates heat for the body
    C. C. It ensures that cold does not get to the body
    D. D. It keeps heat generated by the body from escaping
5. Which of the following parts of a computer plays the function of processing data?
    A. A. Someone bouncing the ball on a cemented floor
    B. B. A goal keeper grasping a ball that has been shot towards the goal
    C. C. Two men pushing a car that is stuck in mud
    D. D. A learner squeezing a circular clay ball into a rectangular
6. Jamal drew the teeth below during Science and Technology lesson.
