Read the passage below then answer questions 6-10

A severe drought once hit the land. Lakes, streams and rivers all dried up. There was very little pasture left for the animals to graze. The once healthy and strong animals became thinner and weaker by day. They all feared for the worst. King Lion called for an emergency meeting. A solution to the problem had to be found. All animals attended, except the stubborn hare who didn't see any reason to join the rest. At the end of the day long meeting the animals agreed to dig a borehole. This they agreed would be a source of water for them and also use the water to irrigate their crops. They were very delighted. The next day, the work began at sunrise.
